SUMMARY

Backend-focused MERN Stack Developer who designs systems that don't lose data and don't get exploited — built a zero-loss migration strategy and an audit-safe ledger architecture in production at Quba Info Tech. Ships full-stack when needed (React, Next.js), but the core strength is backend systems built to survive real users and real money.

WORK EXPERIENCE

MERN Stack Developer , Quba Info Tech

June 2026 - Present

- Accomplished zero-data-loss schema evolution across 10 production migrations, as measured by a 0% data-loss rate, by designing phased, nullable-first Prisma migrations for MySQL after identifying data-loss risk in earlier migration approaches.
- Accomplished auditable, tamper-resistant financial record-keeping, as measured by 100% of fee transactions traceable to an immutable source record, by architecting an append-only ledger (AccountTransaction) with atomic fee-to-transaction linking and RBAC-gated access.
- Accomplished reduced unauthorized data access risk across 8 application modules, as measured by 5 distinct user roles governed under one access model, by implementing RBAC via ProtectedModule/ProtectedRoute/useUser.

MERN Stack Developer Intern, Quba Info Tech

Feb 2026 - May 2026

- Accomplished production-grade backend delivery across 20+ API endpoints, as measured by no known post-release rework, by building and consuming RESTful APIs in Node.js and Express.js under senior developer review.

MERN Stack Developer Trainee, Valudas Tech Park

June 2024 - Jan 2026

- Accomplished a complete e-commerce platform built from scratch supporting a 30+ item product catalog, as measured by a fully functional checkout flow with integrated payment gateway, by developing ZepX with React, Node.js, Express, MySQL, and Razorpay integration.
 - Accomplished secure authentication across multiple projects, as measured by consistent JWT and OAuth implementation with no reported auth failures, by integrating JWT authentication and Google OAuth into multiple RESTful APIs.
-

TECHNICAL SKILLS

- Backend:** Node.js, Express.js, Prisma ORM, REST APIs, JWT Auth, RBAC design
 - Frontend:** React.js, Next.js, JavaScript, Tailwind CSS, HTML5, CSS3
 - Database:** MySQL
 - Tools:** Git, GitHub, Postman, VS Code, Slack
-

EDUCATION

Gokul Global University

July 2024 – Present

Bachelor of Science in Information Technology (BSC IT)

Exam-based program structure (no mandatory attendance), pursued alongside full-time industry work.

PROJECTS

Sheetal Sweets & Bakery | [Live Site](#)

Technology :- React, Node.js, Express.js, MySQL

Fully responsive business website for a local brand, deployed on Hostinger VPS with Nginx reverse proxy and PM2 process manager, confirmed live and reachable. Includes product showcase and brand storytelling.

ZepX E-commerce Platform | [GitHub](#)

Technology :- React, Node.js, Express.js, MySQL, Razorpay, Google Auth

Full e-commerce platform built from scratch supporting a 30+ item product catalog, with JWT authentication, admin dashboard, cart functionality, and integrated Razorpay payment gateway (test-mode).
